

**European Guidelines Meeting on Laparoscopic Liver Surgery**  
 10 - 11 February 2017, Hilton Ageas Bowl, Southampton, UK  
**Poster Presentations**

Programme no	Title	Presenter
P01	Laparoscopic microwave liver ablation and portal vein ligation. An alternative approach to conventional ALPPS procedure in hilar cholangiocarcinoma.	Ferretti
P02	Laparoscopic Left Hepatectomy for unknown Tumour above the Main Bile Duct Bifurcation	Gomez
P03	Laparoscopic resection of centrally located hepatic CRC metastasis (lap hepatic tunneling) : a case report	Berti
P04	Laparoscopic liver resection versus radiofrequency ablation for minimally invasive treatment of single, small hepatocellular carcinomas	Santambrogio
P05	Associated diseases treatment during Robot-assisted liver resection a multidisciplinary approach: our experience in a General Surgery Unit.	Ceccarelli
P07	The impact of liver -deformation and -motion on the accuracy of augmented reality in laparoscopic liver surgery	Schneider
P08	Implantation and development of a Laparoscopic Hepatic Surgery Program. Experience in a Reference Center	Gomez
P09	The one hundred most-cited articles on laparoscopic liver surgery	Levi Sandri
P10	Redo laparoscopic hepatectomy: a safe procedure	Lopez-Ben
P11	Radiofrequency-Assisted Liver Partition and Portal Vein Ligation for Staged Hepatectomy (R-Alpps). A Preliminary Experience with a fully Laparoscopic First Stage Approach	Iaria
P12	Laparoscopic liver resection for metastatic melanoma	Aghayan

Programme no	Title	Presenter
P13	Major robotic liver hepatectomy: is it a good option? Experience from a single surgical center.	Ferretti
P16	Laparoscopic Closed Full Excision of a Giant Hepatic Hydatid Cyst	Gomez
P17	3D visualization facilitates accurate isolation and division of hepatic vessels during laparoscopic right hepatectomy: a preliminary report	Kawai
P18	Application of ERAS protocols (Enhanced Recovery After Surgery) after in Laparoscopic Liver Surgery. Experience of Liver surgery on a high volume unit	Gomez
P19	Minimally Invasive Liver Resections out of Luisville Criteria: our experience on overall 69 patients treated using Robot-assisted surgery in a General Surgery Unit.	Ceccarelli
P20	Robot-Assisted One-Stage Resection of Gastrointestinal and Colorectal Cancer and Synchronous Liver Metastases: Our Experience and Literature Review	Ceccarelli
P21	Minimally Invasive Robot-assisted Surgery in elderly and very elderly patients. Our experience.	Rocca
P22	A Single Unit initial Experience of Minimally Invasive Liver Surgery	Alaraimi
P23	Laparoscopic Left Hepatectomy due to Symptomatic Dilatation of the IV Segment Bile Duct	Gomez
P24	Experience of Hydatid Disease of Liver at a Tertiary Care Center 7 Years Experience	Abbasy
P25	A novel electrical dexterity system to selectively train and assess depth perception among laparoscopic trainees	Metry
